Rotem is a world leader in PET consumables, supplying cyclotrons around the world with ^{18}O enriched water, precursors, reagent kits and plastic cassettes for the various synthesis modules. All these are produced in-house at our state of the art cGMP Q7 certified facility, to ensure users with uniformly high yields and unsurpassed quality.

Rotem works closely with leading pharmaceutical companies to develop, optimize, manufacture and distribute consumables for the synthesis of new PET tracers.

Our clients enjoy full technical and regulatory backup from our highly qualified scientific staff.
